

M339G: February 16th, 2026.

Linear splines.

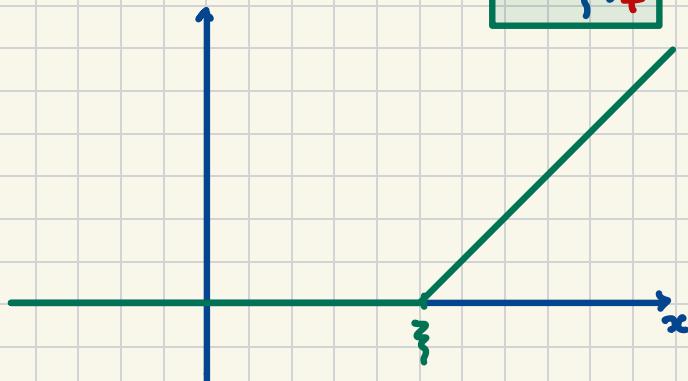

Positive-Part function.

$$x \mapsto (x)_+ := \max(x, 0)$$

Example. For any $\xi \in \mathbb{R}$, let's graph $\zeta(x)$

$$x \mapsto (x - \xi)_+$$

Useful:
- Deductibles
- Payoff a call/put
- Hinge loss

Using the positive-part functions as basis functions.
